

DPL XtraFlex®

Seamless Knitted Nylon/Spandex Liner
With Nitrile Foam Coating

A pair that
always comes in
handy...

APPLICATIONS

Automotive Industry
Automotive Maintenance & Services
Light Engineering
Painting Industry
Warehousing
General Purpose

FEATURES

Breathable coating to keep hands cool and dry.

Nitrile dots for a better grip and increased protection to the palm and fingers.

Increased cushioning through the use of raised dots in the working area.

Extra light foam coating for ultimate flexibility & dexterity.

'Stretch to fit' design for excellent snug and comfortable fit.

Ergonomically designed to reduce hand fatigue.

Manufactured using an environmentally friendly solvent free process.

XtraFlex®

Nothing slips easily when you have DPL's unique patented StickGrip® technology coupled with the amazing flexibility of stretchable Nylon/Spandex liner which acts as a cool second skin. The better grip ensures significantly lower finger fatigue, greater productivity and fewer injuries. The matrix of soft matt Nitrile foam protrusions cushion the palm and fingers giving additional protection to the work areas.
